EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The Abstract has been amended as follows in an effort to remove the word "means":

In lines 3-4, "means for controlling" has been changed to --controller for--;

In line 8, "means for rotating" have been changed to --rotating mechanism--; and

In line 11, "means for controlling" has been deleted, and after the word "enclosure" the phrase --is controlled by--has been added.

Drawings

2. The following changes to the drawings have been approved by the examiner: the drawings must show every feature of the invention specified in the claims, therefore, the "**shower head** in fluid communication with a water supply" must be shown. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be

canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency.

Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. In order to avoid abandonment of the application, applicant must make the above drawing changes.

The following is an examiner's statement of reasons for allowance: the claims in this application have been allowed because the prior art, alone or in combination, does not disclose an animal toilet enclosure having a bottom section removably coupled to a floorboard section, a cover section removably coupled to the floorboard section, and a means for controlling the enclosure; wherein the bottom section has a bowl with an outlet in fluid communication with a grinding device and a sewer, the floorboard section has multiple floorboards each coupled with a floorboard axle having either an active or passive means for rotating, and the cover section has a sliding door, a hinged top, multiple vertical walls, and at least one shower head in fluid communication with a water supply; and wherein the means for controlling the enclosure has sensors and a pre-programmed activation circuit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
